Name: group inviter Description:

Title: GROUP INVITER

Assigned Members: JoeBlack Randt

Members are visible

Allowed Abilities:

- Membership
 - Invite People to this Group
 - Eject Members from this Group
 - Toggle 'Open Enrollment' and change 'Si
- Roles
 - Create new Roles
 - Delete Roles

Refresh OK Cancel Apply

Select „Group Info” folder in your SL viewer and select „Members & Roles” option. You must create new role (for example „group inviter”). Next you should select „Invite People to this Group” checkbox and press „Apply” button. Now your bot has permission to invite to the group.

Next you must rezz FVC Group Inviter and select „Edit” option by right mouse button clicking on inviter.

Press „Set” button and select the group. Now you can enter to the „Content” folder and edit „data” notecard. You must write your bot key and save notecard. If you don't know what is your bot key you can check it using this www side:

<http://who.felis-net.com/>

or any other tool.

Next touch the inviter and select RESET option. Other way is setting bot key by chat message on channel 13 (but you don't reset inviter this time), for example:

/13 00000000-0000-0000-0000-000000000000

Touch inviter and set other options:

TIMER – reset timer 12h, 24h, 48h, one week

RANGE – scan range, use „+” „-” keys for change

If you press STAT button inviter send you IM with simple statistic

FVC Group Inviter is ready to work. In the end you must press „Inviter” button in your U-bot software.

You can use many inviters with one bot and place inviter in other region than bot.
